

/home/runner/work/fluentscpp
/fluentscpp/src/asserts.h

```
graph TD; A["/home/runner/work/fluentscpp  
/fluentscpp/src/asserts.h"] --> B["sstream"]; A --> C["string"];
```

The diagram illustrates a dependency structure. At the top, a gray rectangular box contains the file path `/home/runner/work/fluentscpp` and `/fluentscpp/src/asserts.h`. Two blue arrows originate from the bottom edge of this box. The left arrow points to a white rectangular box labeled `sstream`. The right arrow points to another white rectangular box labeled `string`. This indicates that the `asserts.h` file depends on both the `sstream` and `string` headers.
